

## APM Project Management Awards

Each of the criteria is scored 0-25 and each section is weighted accordingly

### Categories:

#### Project Management Company of the Year:

For organisations who deliver projects for their own organisation.

The APM judges are looking for the ways in which companies operate as project oriented organisations. How they are structured, how they formulate strategy, the impact projects, programmes and portfolios have on organisational culture, how they have developed their processes and how they implement assurance. How they form teams, plan their team work, manage their data. They are looking at the role of sponsors and the interfaces with the wider organisation. What training has been necessary and how has it been implemented in making changes to their company? What difference have the changes made to the company results or improvements in operation?

Organisational design	Weighting 25%
