			programme management tools and systems				
Ewan	Glen	Full	I have been working in project management and control roles for over 20 years, in both delivery and advisory roles. In more recent years I have been working in roles such as the Programme Planning Manager for the Type 26 Global Combat Ship, Technical Lead for a project control transformation programme within a government department and	I have been involved with the Planning, Monitoring and Control SIG for over a dozen years, both on the committee and as a member of the wider working group. I enjoy the work we do and see it as providing significant value to the profession as a whole. I'd like to continue this.	I have in depth experience in the application of project controls across a range of projects, from large to small and in different sectors. As part of the SIG I've also supported the development of a number of publications and in conferences. I'm passionate about project controls and enjoy working with the diverse group that form the SIG.	Up to 5-10% of my time on average.	
Keith	Haward	Full	Has specialised in Planning and Project Controls since 1975. Worked in the Construction Industry for twenty years rising to Planning Director. Has experience of working in UK, France, Middle East and Poland. From 1992 to 2007 worked in the rail industry. Returned to construction in 2007 on the Olympic Park Enabling Works project. Worked on the planning for two nuclear design projects. (SC Cleared). Recently worked on	I want to play a larger role in Planning Monitoring and Control SIG.	I have a broad experience in Project Controls. I am familiar with managing large meetings through my professional career. I was the Chairman of a Christian Charity for many years.	10 hours	Nothing for AOB

			strategic interface planning at Heathrow. Retired from full-time employment in June 2014. From June 2015 as a STEM Ambassador has become more and more involved in helping local schools and colleges.				
Edwina	Hayward	Associate	I have worked in project controls and project management roles over the last 17 years. These roles have mainly been in the Defence market and in large programmes for the Army and Navy. These roles have included all project controls disciplines including planning, scheduling, assumptions management, risks and issues management, earned value management and performance reporting. I have worked through all aspects of the disciplines including undertaking the activities, coaching and mentoring and undertaking maturity reviews and suggesting improvement activities. I have also headed up the project controls capability within BMT HQS over the last few years and have been an active member of the PMC	I have been an active member of the SIG over a number of years and a committee member for the last year. I think that I can bring my knowledge and experience to the SIG and have enjoyed being a committee member. I also feel that this is good for my personal development to gain knowledge from across other sectors. I believe that my knowledge and experience along with those from across sectors and experience can help to shape the future of project controls	I have many years of experience with both the Risk and PMC SIGs, both as members and on the committees. I believe this gives me a good knowledge of the APM and how SIGs work. I believe that my practical experience of project controls within the work place, and the defence sector give me knowledge and experience that would be of value to the SIG. My role as the head of the project controls capability within BMT gives me experience in leading the company's capability in providing a project controls	On average I believe that 0.5 days a week would be achievable. 			SIG and Risk SIGs over the last 15 years of so.		capability to our clients and how this influences the training needs of the staff as well as satisfying their personal development needs.		
Milla	Mazilu	Full	I began my railway career in 2005, initially working with Union Railways on the Channel Tunnel Rail Link (HS1) then with Network Rail, the railway infrastructure owner and operator for Great Britain. I have spent the last decade focusing on programme controls, planning, scheduling, and integration in the railway industry. Notably, between 2009 and 2013, I was the programme controls planning and scheduling lead on Network Rail's programmes for National Electrification and National Grid Supply Point, where I developed the integrated planning strategy prior to the handover to regional design and delivery teams. Since 2013, I have been the programme controls lead in Network Rail's programmes for the deployment of Traffic Management (TM), European Train Control System (ETCS), and	A continuation of my volunteering effort to support the SIG and the APM in creating a home for project controls professionals.	Tenacity, energy, and an inclusive environment for all contributors.	A couple of hours.	None.
