

First name:	Surname:	What is your membership level?	Brief overview of your background and experience as a Planning, Monitoring and Control professional: (maximum 150 words)	What motivated you to put yourself forward for election to the Planning, Monitoring and Control SIG committee? (maximum 150 words)	What qualities, skills and experience do you think you'll bring to the Planning, Monitoring and Control SIG committee? (maximum 150 words)	How much time do you anticipate being able to spend on SIG activities in an average week?	AOB for AGM
Richard	Dealhoy	Full	<p>I am a director level Programme Manager, specialising in Planning, Controls and Governance of major projects, programmes and portfolios. I am Head of Planning and Controls for Wood's Environment and Infrastructure Service's, European business, including the Information Management (CDE/BIM) team. In addition to his business leadership role I specialise in the development of new PMO / Controls functions, and management of the associated business change, reinvigorating failing examples or leading on major deliveries / portfolios as</p>	<p>A desire to give back to our community and to learn more about emerging trends and processes. To have visibility of the best things we do and to promote Controls as a professional career path and dispel the myth the we are the "poor cousin of PM".</p>	<p>As an experienced consultant the primary skill I bring to this role is a breadth of experience. I am able to articulate and apply the core functions of Controls across most project types. Understanding the focus and requirements of the Controls Function from a client, supplier or funding owner perspective, allowing insights in to the industry from varying perspectives and maturities. I have held both senior and technical leadership roles within employers and projects, developing both mentoring and leadership skills whilst retaining the ability to</p>	<p>3-4 hrs flexing as required.</p>	<p>N/A</p>

			<p>required. I was recruited by Wood as a founder member of Wood's Programme and Project Services business (PPS), tasked to build a capability/function specifically to offer world-class management and delivery consultancy as a standalone external service to Wood's existing customer base and beyond.</p>		<p>listen to and adopt new ways of working and emerging best practice. Current primary professional skills:</p> <ul style="list-style-type: none"> <li>- Function Leadership</li> <li>- Project and Programme Management</li> <li>-PMO and Governance development - Consulting</li> <li>- Setup and operation of PMO's – Delivery</li> <li>- Controls Management of Portfolios / Programmes (£100m+ per year) § P3O Registered</li> <li>- Project Controls in delivery phases (large/mega £500m+)</li> <li>- Project Controls in development and design phases (mega £3.5bn+)</li> <li>- Stakeholder Management &amp; Senior team - C-suit facing and up-management</li> <li>- Requirements identification and programme definition</li> <li>- Portfolio Management - Governance structures, lifecycles and process</li> <li>- Assurance and Quality -</li> </ul>

					Supplier Management (internal and external)		
Ewan	Glen	Full	I've supported a range of projects for the last couple of decades in establishing and operating appropriately scaled project control frameworks. Currently I'm acting as Programme Control Manager for a £4.5Bn government programme.	I've been involved with the APM, and more specifically the PMC SIG, for over a decade now. Working with the APM volunteers on the SIG is a rewarding activity, allowing me to apply my knowledge to the development of the profession.	Knowledge of all aspects of project controls, knowledge of what the SIG has done in the past (what has worked, what hasn't worked), willingness to get involved.	1-2 days per month.	None.
Edwina (Edi)	Hayward	Associate	I have worked in project controls on a number of Defence projects over the last 15 years. My roles have included risk management, scheduling, reporting and earned value analysis for the Type 45 destroyer project, scheduling across all line of development for the Specialist Vehicle project for the Army and defining the project controls framework across the Maritime Combat Systems team managing around 400 equipment's for the Navy.	I am keen to be involved with the professional body to help shape the way that project controls is undertaken in the future. I value the opportunity to exchange knowledge and experience with the SIG and across the wider project controls community.  I have valued being part of the SIG committee up to press and would welcome the opportunity to continue this going forward.	Having been involved with project controls over a number of years I feel that I have a lot of experience that can be shared. The ability to pass on lessons that I learned, ways to overcome issues, ways of showing people the benefits of using project controls to manage projects and different ways to approach things.  I enjoy working with people from other industries and with other experience to share that information and to help provide guidance for others. I	Around half a day a week.	None.

**APM Planning, Monitoring and Control SIG**  
**Supporting statement from the committee nominees 2019-2020**

			<p>I have undertaken Integrated Baseline Reviews across a number of projects Provided Earned Value Analysis</p> <p>I led the Project Controls capability within BMT, helping to drive the internal company capability including assurance of our work for clients and</p> <p>I was involved in the working group that produced the APMs Risk and Earned Value Management Guide and have been on the committees for the Risk SIG and Planning, Monitoring and Controls SIGs over a number of years.</p>		<p>look forward to the opportunity to pass on the learning that I have had personally as well as a collective to shape the way that other use the skills in their own industries and careers.</p>		
Keith	Haward	Full	40 years plus in Project Controls	I enjoy attending, working (and socialising) with the SIG attendees	40 plus years experience. Self motivated. Sense of humour. Ability to enjoy a drink with colleagues after a SIG meeting!	20 +	Nothing for AOB
Milla	Mazilu	Full	I have worked in the Programme Controls discipline in the Railway industry for over a decade.	Since I first became involved, I have seen the SIG go from strength to strength; I would like to continue supporting this as part of the committee.	Stamina, energy for progress, drive to maintain an inclusive SIG environment where volunteers can contribute in a variety of ways.	On average, 5-10 hours.	None.

Steve	Wake	Full	Senior thought leader in the projects community. Extensive contact network. Starter and finisher of ideas. I Have led the creation of many Planning EV and Governance products. And a great advocate spoken and written	A commitment to the constant improvement of the profession.	Founded the EVM SIG in 1998 rescuing the Planning SIG by merger along the way. Know all the history. Thought leader. Creative. Great chair. I get things done and honour my commitments. Made this his SIG is the most productive SIG and the best-selling.	As required and more than most.	When will the Volunteers be directly accountable to the Board and not the CEO. This is poor Governance. Can the VSG be reformed and reshaped to be the voice of the Volunteers rather than the recipient of briefings from the Executive. Supported not managed.
