

## COLLABORATING TO DELIVER PROJECTS

The delivery of high value, complex, multi-disciplinary projects and programmes increasingly requires organisations to work collaboratively in a mutually supportive, trusting, integrated and seamless manner.

In order to derive the potential benefits of working collaboratively, organisations must understand and effectively apply the required collaborative systems, procedures, tools, procedures, competencies and behaviours. This conference seeks to explore these key aspects in order to maximise the value of delivering projects in collaborative arrangements and minimise the risk of failure.

**The conference is being jointly convened by the Association for Project Management (APM) and the Institute for Collaborative Working (ICW)**

### Objectives

The conference will provide you with:

- increased knowledge on why and how to deliver projects in a collaboration;
- practical learning that will help delegates improve the delivery of collaborative projects;
- a range of learning experiences, both in terms of topic and format; and
- excellent networking opportunities with other like-minded project professionals.

Start Time	End Time	Activity	
08:45	09:20	Registration, coffee and networking (break out area)	
09:20	09:30	Introduction and Welcome Stewart Wragg (APM)
