

## COLLABORATING TO DELIVER PROJECTS

### Speaker:

**Name:** Stephen Scott

**Talk Title:** Deploying Collaborative working within the Sellafield Ltd Supply Chain

**Description:** Stephen Scott will share the approach/lessons learnt that Sellafield Ltd is taking in deploying collaborative working. He will also outline how such an approach is aligned to the business Corporate and the Supply Chain Directorate Strategic Vision “by working closely with our supply chain through early and regular engagement we can bring best in class and innovative solutions to deliver our customer needs whilst making Sellafield Ltd a client of choice.

**Bio:** Stephen Scott has worked in the Nuclear Industry and for Sellafield Ltd for almost 40 years. He started work in 1980 within the site construction department as a clerk supporting numerous major projects as they commenced and during their construction and commissioning phases. During his time at Sellafield, Stephen has acquired significant and extensive site knowledge and experience in fulfilling a wide range of various roles predominately centred around Commercial, EHS&Q, and Quality Assurance/Environmental and Management System Compliance. Stephen has worked also within the Supply Chain Development Programme in leadership role in implementing a Performance Assurance Framework across the Supply Chain Major Projects portfolio. Within the Supply Chain Directorate Stephen is currently the Programme Lead for developing and Implementing Collaborative Working within several identified Supply Chain Relationships in accordance with the requirements of ISO:44001: 2017. Stephen has recently become an Individual member of the Institute for Collaborative Working.
