

First name:	Surname:	Brief overview of your background and experience in this SIG subject matter: (maximum 150 words)	What motivated you to put yourself forward for election to the APM Planning, Monitoring and Control SIG committee? (maximum 150 words)	What qualities, skills and experience do you think you'll bring to the APM Planning, Monitoring and Control SIG committee? (maximum 150 words)
Jay	Armstrong	15+ years experience in project controls. Worked in North America, Australia and UK in a broad range of industries, mostly in large multi-discipline projects. Active volunteer with the SIG over the past 1.5 years.	Projects make life better. Delivering projects better allows us to do more projects. More projects allows us to make life even better. I am passionate about project controls and the impact it has on project delivery because at its core it is about making life better. I'd look forward to becoming more active within the SIG to share and learn good practise from its many skilled and varied members.	15+ years experience in project controls. Worked in North America, Australia and UK in a broad range of industries, mostly in large multi-discipline projects. I am excited to see and be involved in the ongoing evolution and growth of the profession as technology increasingly influences the way we work and deliver projects.
Scot	Butcher	I have been a project manager or leader of a Project/Programme Management Office for the last 25 years. Most recently, I have led the programme for the improvement of project controls in a £3.5bn per annum industry - leading the design and implementation of a new Project Control System, covering all Project Control sub-disciplines. I have extensive experience of both the implementation and use of Earned Value Management in large and complex engineering projects. I am a trusted Integrated Baseline Review	I have been a member of this SIG for approximately 2 years. In that time I have made sure that I always make a positive contribution. I am a member of the working group developing a new Project Control Maturity Assessment Framework. I have volunteered to deliver a series of webinars on Earned Value Management (dates to be agreed, but plan to be later this year). I also represented the SIG at an APM volunteers forum. Becoming a committee member seemed an obvious	On top of my experience in the subject matter of the SIG, I also bring the following qualities, skills and experience: - Government organisations - Defence - Engineering (I am a Chartered Mechanical Engineer) - Change Management - Leadership skills - Contracting and Contract Management Above all I bring enthusiasm and a passion for the subject.

		Chair within my industry. As an acknowledged Project Controls specialist, I am called upon to negotiate PC requirements into contracts, often with a value in excess of £1bn. I also lead the PM/PC assurance of all projects in my organisation prior to commencement. Most recently, I have been appointed the first ever Project Controls functional lead for my organisation and (on top of the aforementioned change programme) have been tasked with standing up the new function to manage the capability and capacity of all Project Controllers.	step to provide further support to the SIG.	
Ewan	Glen	I have been an active member of the PMC SIG for a number of years, stretching back to an earlier involvement in the EVM SIG. Over this time I've helped develop numerous guides (EVM Compass, IBR Guide, PSMC Handbook, amongst others) and supported numerous events.	I enjoy working with the volunteers engaged with the PMC SIG across numerous workstreams, and am motivated by giving something back to the profession.	I have significant experience in applying P3 management and control practices across a number of government and industry sectors and for projects of varying scale, either acting in delivery or advisory roles.
Keith	Haward	Over 40 years planning and project controls experience, working in Construction, Nuclear and Rail industries. Worked in Oman, Saudi Arabia, Poland and France. Worked on multi £bn projects – Crossrail; Olympic Park Stratford; ITER Nuclear Fusion, France; Heathrow Terminal 2. Specialised in Planning for over 20	Have been involved in the PMC SIG since 2012 and have appreciated the vast experience displayed by the various SIG members over the years. Wanted to contribute more and assist with the running of this group.	Apart from the experience learnt during my 45 year career (see summary above) I have previously been a trustee of a Christian charity, ending up as Chair of trustees for several years. I was a co-author of the successful Planning, Scheduling, Monitoring and Control book published in 2015

		years, rising to Planning Director. Worked extensively with teams covering all aspects of project controls. Project Controls Manager on Olympic Park Enabling Works.		by the APM. Finally I have been an active member of the PMC SIG committee for the last few years and get on well with the current committee.
Edwina	Hayward	I have worked in project controls on a number of Defence projects over the last 15 years. My roles have included risk management, scheduling, reporting and earned value analysis for the Type 45 destroyer project, scheduling across all line of development for the Specialist Vehicle project for the Army and defining the project controls framework across the Maritime Combat Systems team managing around 400 equipments for the Navy. I am currently managing a project for the Navy to deliver a new command system to the minehunting class of platforms. I have undertaken Integrated Baseline Reviews across a number of projects Provided Earned Value Analysis and have led the Project Controls capability within BMT, helping to drive the internal company capability including assurance of our work for clients. I have been involved with APM for a number of years, having been in the working group that produced the APMs Risk and Earned Value Management Guide as well as being on the committees for the Risk SIG and	I am keen to be involved with the professional body to help shape the way that project controls is undertaken in the future. I value the opportunity to exchange knowledge and experience with the SIG and across the wider project controls community. I have enjoyed being part of the SIG committee up to press and would welcome the opportunity to continue this going forward.	Having been involved with project controls over a number of years I feel that I have a lot of experience that can be shared. The ability to pass on lessons learned, ways to overcome issues, ways of showing people the benefits of using project controls to manage projects and different ways to approach things. I enjoy working with people from other industries and with other experience to share that information and to help provide guidance for others. I look forward to the opportunity to pass on the learning that I have had personally as well as a collective to shape the way that other use the skills in their own industries and careers.

		Planning, Monitoring and Controls SIGs and presented at various conferences.		
Milla	Mazilu	I began my railway career in 2005, initially working with Union Railways on the Channel Tunnel Rail Link (HS1) then with Network Rail, the railway infrastructure owner and operator for Great Britain. Prior to 2005, I worked in the insurance industry, specialising in regulatory compliance. Over the past 15 years, I have focused on programme controls, planning, scheduling, and integration in the railway industry. In the last five years, I honed in on modernising processes and systems to improve project delivery. In my current role in Wales & Western Region, I am currently spearheading initiatives in project data analytics across my portfolio.	I enjoy working with the committee and volunteers; I value the work we do to bring benefits to the wider membership.	Inclusive leadership; A passion for learning; Stamina to contribute actively and constructively.
