

First name:	Surname:	Brief overview of your background and experience in this SIG subject matter: (maximum 150 words)	What motivated you to put yourself forward for election to the APM Knowledge SIG committee? (maximum 150 words)	What qualities, skills and experience do you think you'll bring to the APM Knowledge SIG committee? (maximum 150 words)
Martin	Elsner	<p>My involvement with capturing Knowledge reaches back to 2002. During the last eighteen years I contributed towards Knowledge retention in many different environments: public and private sector companies, profit-driven and voluntary-sector, here in Britain and overseas. I managed information as well as learning, in order to maintain a desired level of Knowledge within teams, or organisations in general. In addition to the above, I am interested in principles and particulars of storing and disseminating information. For example, how to harvest information, with the full depth to it, and convert it into an accessible database.</p>	<p>My motivation is to contribute, to learn and to be inspired. I believe the best way for development is to join a group of like-minded people. I would like to take part in discussions about Knowledge, and I am ready to take part in SIG's activities, perhaps through writing or editing blogs.</p>	<p>I could bring to the SIG my experience of managing Knowledge in a variety of settings. Also, I have an excellent attention to detail. I am reliable and well organised.</p>
William	Emmett	<p>I have been a member of APM since I joined the project community in 2015. I have also completed a Masters in Project and Enterprise Management, where I have specialised in Knowledge Management. I have a particular emphasis and bias towards the role of culture and personality in encouraging</p>	<p>One of my biggest frustrations in the project management community is the opinion that Lessons Learned and the inputting of such lessons is what Knowledge Management is. Though this is part of it, I really want to spread the word and encourage the development of Knowledge Management in the</p>	<p>I have been a member of APM since I joined the project community in 2015. 		Knowledge Sharing and exploitation interlinked with having the correct technology and processes in place too.	profession and in industry. I have been discussing Knowledge Management over the last year with the SIG, and would love to continue to have the opportunity to contribute as a committee member.	of culture and personality in encouraging Knowledge Sharing and exploitation interlinked with having the correct technology and processes in place too.
Joelle	Garden	Current Knowledge SIG Committee Chair, Knowledge Management practitioner within a project management context. Advocate for the growth and understanding of KM in organisations.	As a project manager working in a technology startup, it is particularly relevant for knowledge and information to be effectively managed, both within and between projects, and especially as the organisation scales in the coming years. I endeavour to create the best possible knowledge environments for my teams and always willing to try new ideas to support this.	An intrinsic understanding of the benefits of KM, perspective from an industry practitioner, a can-do attitude to experiment with ideas and make both incremental and big-hitting improvements.
David	Pearce	I have been involved with academic and practical implementation of Knowledge Sharing for over a decade. I run a specialist knowledge sharing consultancy.	I joined the committee last year and want to continue working with this great group of people to further knowledge management as a core skill for projects and organisations.	Depth of subject knowledge; practical experience of implementation on large complex projects; wide ranging project and business experience; wide reach through involvement with other groups, including: RIBA, Construction Industry Council, RSA, and CILIP
Steve	Simister	I have been involved in project management for over 35 years. I have worked in a variety of roles as a project manager and consultant within the construction, education and pharmaceutical industries. I am a ChPP and the co-author of a knowledge management book published in 2019.	I have been involved with the KSIG since its inception. As a SIG committee member I want to support how the project management community can engage with the knowledge community to tap into their broader experience and expertise. I see it as beneficial that we have a diverse but complementary range	I have been an APM member for over 25 years. In that time I have been chair of the Contracts & Procurement SIG, founding member of the SIG Steering Group, contributing author for APM's PRAM guide; APM Body of Knowledge 5th and 6th editions, the

			<p>of skill sets on the committee. My experience is more project related but through involvement with the KSIG committee I have learned an enormous amount about knowledge management and have shared my project management insight with others.</p>	<p>APM representative on BSI and ISO standards committees and am an RPP. Hence, I have a deep insight into the workings of APM and as somebody who works with a range of organisations I am aware of the diverse range of needs within the project management community.</p>
