# APM SIGs – Get involved!

The APM SIGs have an important role to play within APM in creating and disseminating new knowledge.

- Input to creating and disseminating new knowledge
- Create knowledge sharing opportunities on current interests of the profession – CPD!
- Further the understanding and practice of tools and techniques
- Inspire future project managers
- Give back to the project management profession
- Learn new skills
- Many more reasons!

# APM Enabling Change SIG 2020/21 chair report

Our mission is to improve the change capability of organisations, teams and individuals. Through webinars and events we engage those interested in change managements. We produce blogs and useful material like our [Introduction to Managing Change](#) book which is great for those new to change management.

We run events and support other SIG's and Branches increasing the understanding and appreciation of change management across the project profession. We also conduct innovative research to support our work and generally advance the body of knowledge relating to enabling change.

Our committee is made up of a team who have experience both in project and change management and recognise that the structured approach to move an organisation from the current stated to a desired future states requires a change management discipline.
