

Name	What is your membership level?	Brief overview of your background and experience as a Planning, Monitoring and Control professional (maximum 150 words)	What motivated you to put yourself forward for election to the Planning, Monitoring and Control SIG committee? (maximum 150 words)	What qualities and experience do you think you'll bring to the Planning, Monitoring and Control SIG committee? (maximum 150 words)	If you have any items for the AOB section of the meeting please list them here:
Paul Bradley	Full	<p>I have worked in a Project and Programme management environment for over 15 years in a variety of delivery focused roles. I have implemented structured project planning approaches, tools and techniques to all aspects of project and service delivery in a number of companies. Recent experience has seen me operate in a more consultancy focused role where I have led a team that has implemented formal Project, Programme and Portfolio Management discipline, including the key elements of planning, monitoring and control (PMC), for specific clients within the Ministry of Defence. Currently, I am working for QinetiQ and head up the global Programme Controls and Planning Function that will drive standardization and best practice in PMC through the development of processes, systems and competences across the entirety of the business.</p>	<p>As head of a group-wide enabling function, it is my vision and desire to create a value-add capability that provides key support to our entire delivery community whilst improving our processes, modernizing our systems and developing our people. To do this I have to understand what best practice looks like, what are the pitfalls and benefits of standardized practices, techniques and tools, what are key risks and opportunities that these bring about and generally learn the lessons of others. The APM Planning, Monitoring and Control SIG is the ideal place for that knowledge and best practice sharing but I equally believe that I have a great deal to contribute in helping to set the agenda for PMC for the future by being at the centre of developing industry standards and the promotion of the PMC profession both within my own company and wider industry.</p>	<p>I believe I bring a willingness to learn and openness to new ideas whilst being able to challenge and bring my own views that will be useful to the PMC SIG in approaching the challenges of developing the profession. My role as a functional leader gives me a wide business perspective that would be a useful addition to the committee and I would be keen to share my cross-sector and domain understanding and experiences. I also have a personal and professional commitment to developing my company's position within the APM and a key role on the committee will support this. In addition, I am always looking for new ways to learn and develop and I believe taking on a committee member role would personally give me opportunities to grow and better my professional understanding.</p>	None.

Ewan Glen	Full	I am a project management and control consultant who has been involved in projects across a range of industries, in both leadership and advisory capacities.	I have worked with the PMC SIG (and previously the EVM SIG) for around 10 years, contributing to a number of the guides and presentations it has delivered.	I am passionate about project controls, and how establishing an effective framework for controls can make a real difference to the delivery of projects.	None.
Edwina Hayward	Associate	I have been involved in providing project controls expertise into projects over the last 12+ years, mainly in the Defence Sector. This experience has ranged from undertaking small scheduling tasks within a project to implementing Project Controls processes across a portfolio of projects and programmes. I have undertaken project reviews, project maturity assessments and Integrated Baseline Reviews including presenting feedback, actions and implementations plans. My work has also included pulling together planning, scheduling and risk information and presenting it for Project Approvals, including engagement with scrutiny and other stakeholders. I currently head up the Project Controls Capability area within BMT Hi-Q Sigma, helping to develop the internal knowledge and skills within the company.	I am keen to be involved with the PMC SIG as I think that it is essential to be part of the professional body leading the way in which planning, monitoring and control is undertaken. Developing new think and ways of working is helped by viewpoints of people from a cross section of industries. I have been actively involved with the APM for a number of years, firstly within the Risk SIG being on the committee for several years and more recently with the PMC SIG. I have attended numerous conferences and events, presented and organised events. I was part of the Working Group that put together the Interfacing Risk and EV guide.	I bring a number of years practical experience within projects. I am motivated and keen to bring my experience and knowledge to develop the latest thinking and provide guidance and information to those within the profession. I am also keen to gain knowledge and experience by involvement in opportunities that would not be available during my normal working environment.	n/a
Milla Mazilu	Full	I started my railway programme controls career on the Channel Tunnel Rail Link and have never looked back.	Working with the PMC SIG until now has been enjoyable and rewarding.	Collaborative leadership, vision, and stamina.	None, thank you.

Raluca Popa	Associate	I have worked within Project Controls functions over 12 years mostly as a specialist in document management.	I would like to exchange idea with new colleagues, to share my expertise in the field and to learn new things.	I am enthusiastic and full of energy, I like to work in a team. I have experience in Construction, Engineering, O&G Industry, Consultancy and Project Management.	None at the moment.
Steve Wake	Full	Member since 1998. International expert in Planning and Control. EVM in particular.	Continue involvement in direction and growth of the subject profession body and community for public benefit.	Experience creativity influence managerial.	none
