

Name	Membership	What motivated you to put yourself forward for election to the East of England branch committee?	What qualities, skills and experience do you think you'll bring to the East of England branch committee?	AOB
Mark Buckton	Full	I have supported the Branch as Secretary for a number of years and would be pleased to continue to provide that support.	Having been a Project Manager, Programme Manager, Change Manager and SRO I have experience and links to a number of the resources that would be useful to members.	
Brent Crossman	Associate	To support the development of the Project Management profession within the East of England. To encourage the development of best practice through effective and engaging knowledge transfer, and to maintain a relevant and supportive professional network for the mutual benefit of all members. To encourage both new professional and student project & programme management specialists to join the APM to increase awareness of the association across both public and private sectors, with our area.	I am a proven Project management professional with both FMCG and Business Process Management experience with a strong desire to help others further develop their professional competencies in a safe and supportive environment. I genuinely believe that the best way to learn and develop is through a combination of; shared best practice (APM BOK), Shared experience (Professional networks) and facilitated knowledge transfer & reflection (APM events). I also believe that the diversity of our collective professional experience within the East of England branch committee is a core strength, as it represents and actively conveys the breath of opportunities with the Project Management profession.	
Chris MacLeod	Full	I'm passionate about project management and am keen to see the profession thrive, especially in the East of England. In particular, I am keen to promote the profession as a career path for young people to consider and to help raise awareness of the transferable skills they can learn and go onto utilise throughout their careers. There are also real opportunities to identify local project professionals and bring them together to facilitate networking events and the chance to learn from the experiences of others in similar roles. The APM's recent Chartered status is also of significant interest to me as I hope it will help to enable PPM professionals to be recognised equally with professionals in other disciplines, and this is something I would like to help the APM to roll-out.	I am an experienced project and programme manager having operated in central government and the Higher Education sector where I have delivered in IT, policy, operational and organisational change environments. These experiences have helped shape my thinking about the profession and I hope to bring energy and drive to the committee to enable the APM to extend and strengthen its reach across the region. I am also a trustee and vice chair of a local charity and so understand committee working and the benefits and impact a group of similarly minded people coming together can make. Having said all that, I don't take myself too seriously and so will do my best to dig out my sense of humour on the way to committee meetings...	
Lynn Newman	Full	To further good project management in the EoE	organisation, educational knowledge, PM knowledge	
Charles Willbe	Fellow	Desire to help colleagues proving useful services to members within the region.	Past-Chairman of EoE Branch with experience of serving Corporate Members (previous and current Corporate Rep.).	

Maria Duncan	Full	I have been a member for a few years now and I am currently the treasurer of the branch. We have already organised some very good events and have a good team in place. I would like to improve and strengthen the EoE's impact during 2017-18.	I am relatively newly qualified with the APM Certified Project Manager in 2015 and the Prince2 in 2017. I do not get many opportunities to use the qualifications fully at work as my job relates to Research Project Management. I work in research within science and disability. I have worked most of my life within education and I am currently the higher education link within the branch.	Increasing active members of EoE committee
