

Stream A – How can we assure projects in an “agile” environment?

Format:

A 45 minute interactive session focusing on the assurance of agile delivery

Approach:

Led by 3 of the authors from the recently published “Guide to the assurance of agile delivery” this session allows for small discussion groups to discuss and share best practice on the key areas of assurance and how they may differ from the more traditional approach

Content:

- How should you approach and prepare for assurance reviews of agile projects?
- What will be different when undertaking reviews?
- Is it really possible to assure governance and risk in an agile environment?
- What should be the output of your review?
- What are the challenges in assuring agile projects in your organisation?

Key take-aways

- A greater understanding of how to approach an agile review
- Greater knowledge of current thinking from public and private sector on how agile assurance is being delivered
- A networking opportunity to help you with your approach to the assurance of agile delivery.

This presentation was delivered
at an APM event
