The programming obligations in NEC make me: 0 2 2

More likely to use NEC rather than another standard form

100 %

Less likely to use NEC rather than another standard form

0 %

Tonight's session was good because:
(1/2)

- Highlighting of newx "tools" in NEC4 and how to use them to manage the contract
- Great speaker, very experienced
- Very well explained and well put together presentation.
- Really well explained.
- Knowledgeable presenter, clear info-graphics and good explanations/descriptions provided.
- Clear and concise. Always good to be able to ask questions to an NEC expert!
- New in to role, have previously been told to

read a book, saw these webinars and it's made it so much better, I feel like I actually know what I'm on about to the contractor now
- I can apply the learning.
- All really relevant to my new role, thank you!
- Great explination on the rules
- informative and easy to understand
- Engaging Speaker
- Its an essential knowledge requirements for most projects. You can't get away from them especially in light of the NEC being used more & more. Thank you

Tonight's session was good because:
(2/2)

016

- Very well presented. Good pragmatism and practical advice.
- Very informative
- Went into a lot of details, which was really good. However it was abit fast but that's understandable as a lot to cover in an hour

Tonight's session would have been better if:

0 0 3

- I was great
- We had more time.
- N/A
